THE FOLLOWING SUMMARY INFORMATION IS PROVIDED AS A COURTESY; IT SHOULD NOT BE TREATED AS LEGAL ADVICE AND IT SHOULD NOT BE RELIED UPON. LEGAL CONSULTATION MAY BE WARRANTED IF AN APPEAL OR OTHER LEGAL CHALLENGE IS BEING CONTEMPLATED.

\*\*\*\*\*

Decisions of the Community Zoning Appeals Board (CZAB) may be subject to appeal or other challenge. For example, depending upon the nature of the requests and applications addressed by the CZAB, a CZAB decision may be directly appealable to the Board of County Commissioners (BCC) or may be subject to challenge in Circuit Court. Challenges asserted in Circuit Court, where available, must ordinarily be filed within 30 days of the transmittal of the pertinent CZAB resolution to the Clerk of the BCC. Appeals to the BCC, where available, must be filed with the Zoning Hearing Section of the Department of Regulatory and Economic Resources (RER), or its successor Department, within 14 days after RER has posted a short, concise statement (such as that furnished above for the listed items) that sets forth the action that was taken by the CZAB. (RER's posting will be made on a bulletin board located in the office of RER.) All other applicable requirements imposed by rule, ordinance, or other law must also be observed when filing or otherwise pursuing any challenge to a CZAB decision.

Further information regarding options and methods for challenging a CZAB decision may be obtained from sources that include, but are not limited to, the following: Sections 33-312, 33-313, 33-314, 33-316, and 33-317 of the Code of Metropolitan Dade County, Florida; the Florida Rules of Appellate Procedure; and the Municode website ([www.municode.com](http://www.municode.com)). Miami-Dade County does not provide legal advice regarding potential avenues and methods for appealing or otherwise challenging CZAB decisions; however, a licensed attorney may be able to provide assistance and legal advice regarding any potential challenge or appeal.

<b>Applicable Zoning Code Section(s)</b>	Section 33-311(A)(7) Generalized Modification Standards (see attached Zoning Recommendation Addendum)
<b>Recommendation</b>	<b>Approval</b>

The application was deferred from the October 22, 2014 hearing of Community Zoning Appeals Board (CZAB) #2 due to a lack of a quorum.

**REQUEST:**

DELETION of a Declaration of Restrictions recorded in Official Records Book 24650, Pages 1768 - 1774.

The purpose of the request is to delete the existing covenant in order to allow the applicant to develop the property in accordance with the Ojus Urban Area District (OUAD) regulations.

**PROJECT DESCRIPTION AND HISTORY:**

The subject property has been the subject of several zoning approvals from 1954 to 2013. In April 2006, pursuant to Resolution #CZAB2-2-06, the subject property was approved for a district boundary change from BU-1, Neighborhood Business District, and RU-3M, Minimum Apartment House District to RU-4M, Modified Apartment District, along with other ancillary variances. At the time of approval, the applicant(s) proffered a covenant that restricted the development of the property to a 408 residence townhouse development.

In March 2007, pursuant to Resolution Z-3-07, the subject property was part of a Director's application for a larger tract of land that was approved for a district boundary change from multiple zoning districts to OUAD.

Subsequently, in December 2013, pursuant to Administrative Site Plan Review (ASPR) #A2013000013, the property was approved to allow the applicant to develop a 400 unit multi-family mixed use development, including 4,006 sq. ft of retail area. Said approval is within the density threshold allowed under the OUAD Regulations.

The applicant now seeks the approval of a request to delete the prior Declaration of Restrictions in order to allow the applicant to develop the 16.35 +/- Acre property in accordance with OUAD regulations. The applicant is not seeking a variance of OUAD regulations or any other zoning regulations applicable to the property.

<b>NEIGHBORHOOD CHARACTERISTICS</b>		
	<b>Zoning and Existing Use</b>	<b>Land Use Designation</b>
<b>Subject Property</b>	OUAD; vacant land	Community Urban Center
<b>North</b>	OUAD; vacant land, office building and duplex residences	Community Urban Center
<b>South</b>	OUAD; vacant parcels, trailer park, apartment residences and warehouse building	Community Urban Center
<b>East</b>	City of Aventura (apartments and commercial retail)	Business and Office
<b>West</b>	OUAD; single-family residences	Community Urban Center

#### **NEIGHBORHOOD CHARACTER:**

The property is located in the Ojus Urban Area District (OUAD). The subject property is surrounded to the north, south and west by apartments, duplex residences, an office building, single-family residences, a vacant parcel of land and a warehouse building also located in the OUAD. To the East of the subject property are apartments and commercial uses located in the City of Aventura.

#### **SUMMARY OF THE IMPACTS:**

Approval of this application will allow the applicant to develop the subject property in accordance with the regulations of the Ojus Urban Area District (OUAD). Staff opines that the approval of the application would be consistent with the traffic impacts previously analyzed at the time of the rezoning to OUAD and that no new traffic impacts are anticipated.

#### **COMPREHENSIVE DEVELOPMENT MASTER PLAN ANALYSIS:**

In March 2007, pursuant to Resolution Z-3-07, the subject property was a part of a larger tract of land that was rezoned to the **Ojus Urban Area District (OUAD)**. The Comprehensive Development Master Plan (CDMP) Land Use Plan (LUP) map designates the subject property as lying within the **OUAD**. Urban Centers are identified as hubs for future development intensification in Miami-Dade County, around which a more compact and efficient urban structure will evolve and are intended to be moderate-to-high-intensity design-unified areas that will contain a concentration of different urban functions such as residential uses integrated both horizontally and vertically. Emphasis in design and development of these centers and all of their individual components have been created to

promote active pedestrian environments through high-quality design of public spaces as well as private buildings; human scaled appointments, activities and amenities at street level; and connectivity of places through creation of a system of pedestrian linkages. All of the parcels within the boundaries of the approved OUAD described in Ordinance #06-68, are regulated by plans and descriptive standards which are consistent with the CDMP Land Use Element interpretative text for Urban Centers.

The purpose of the this application is to allow the applicant to delete a Declaration of Restrictions which restricted the development of the property to a previously approved site plan for a 408 unit townhouse development in order to develop the property in accordance with OUAD.

As such, staff opines that the application is **compatible** with commercial and residential mixed uses allowed in the OUAD and therefore **consistent** with the CDMP LUP map Urban Center designation and the Land Use Element interpretative text for Urban Centers.

#### **ZONING ANALYSIS:**

When the application to delete a prior Declaration of Restrictions, is analyzed under Section 33-311(A)(7), Generalized Modification Standards, staff opines that approval of the application would not create a negative impact on the surrounding area. Staff notes that the Platting and Traffic Review Section of the Department of Regulatory and Economic Resources (RER), the Division of Environmental Resources Management of (RER) and the Miami-Dade Fire and Rescue Department (MDFRD) have no objections to the application, and have indicated in their memoranda that approval of the application will not impact traffic or services in the area.

Further, staff notes that the subject property, a vacant parcel of land, is within the Core, Center and Edge Sub-Districts and is designated MC, Mixed Use Corridor and R, Residential on the regulating plans for the Ojus Urban Area District (OUAD) that were approved in March 2007. The R, designation permits a residential density of 6-13 units per net acre, and the MC, designation district permits a residential density of 52 units per net acre. Staff opines that the approval of the application will allow the development of the property within the guidelines of the aforementioned ASPR, which is within the density threshold allowed and implements the design standards of the OUAD, and therefore, would be **compatible** with the surrounding area.

**Therefore, staff recommends approval of the application under Section 33-311 (A)(7), Generalized Modification Standards.**

## COMPREHENSIVE DEVELOPMENT MASTER PLAN (CDMP) OBJECTIVES, POLICIES AND INTERPRETATIVE TEXT

<b>Urban Centers</b> (Pg. I-45-48)	<p><i>Diversified urban centers are encouraged to become hubs for future urban development intensification in Miami-Dade County, around which a more compact and efficient urban structure will evolve. These Urban Centers are intended to be moderate- to high-intensity design-unified areas which will contain a concentration of different urban functions integrated both horizontally and vertically. Three scales of centers are planned: Regional, the largest, notably the downtown Miami central business district; Metropolitan Centers such as the evolving Dadeland area; and <b>Community Centers</b> which will serve localized areas. Such centers shall be characterized by physical cohesiveness, direct accessibility by mass transit service, and high quality urban design. Regional and Metropolitan Centers, as described below, should also have convenient, preferably direct, connections to a nearby expressway or major roadways to ensure a high level of countywide accessibility.</i></p> <p><i>The locations of urban centers and the mix and configuration of land uses within them are designed to encourage convenient alternatives to travel by automobile, to provide more efficient land use than recent suburban development forms, and to create identifiable "town centers" for Miami-Dade's diverse communities. These centers shall be designed to create an identity and a distinctive sense of place through unity of design and distinctively urban architectural character of new developments within them.</i></p> <p><i>The core of the centers should contain business, employment, civic, and/or high-or moderate-density residential uses, with a variety of moderate-density housing types within walking distance from the centers. Both large and small businesses are encouraged in these centers, but the <b>Community Centers</b> shall contain primarily moderate and smaller sized businesses which serve, and draw from, the nearby community. Design of developments and roadways within the centers will emphasize pedestrian activity, safety and comfort, as well as vehicular movement. Transit and pedestrian mobility will be increased and area wide traffic will be reduced in several ways: proximity of housing and retail uses will allow residents to walk or bike for some daily trips; provision of jobs, personal services and retailing within walking distance of transit will encourage transit use for commuting; and conveniently located retail areas will accommodate necessary shopping during the morning or evening commute or lunch hour.</i></p> <p><i>Urban Centers are identified on the LUP map by circular symbols noting the three scales of planned centers. The Plan map indicates both emerging and proposed centers. The designation of an area as an urban center indicates that governmental agencies encourage and support such development. The County will give special emphasis to providing a high level of public mass transit service to all planned urban centers. Given the high degree of accessibility as well as other urban services, the provisions of this section encourage the intensification of development at these centers over time.</i></p>

## PERTINENT ZONING REQUIREMENTS/STANDARDS

<b>33-311(A)(7) Generalized Modification Standards</b>	<p><i>The Board shall hear applications to modify or eliminate any condition or part thereof which has been imposed by any final decision adopted by resolution, and to modify or eliminate any provisions of restrictive covenants, or parts thereof, accepted at public hearing, except as otherwise provided in Section 33-314(C)(3); provided, that the appropriate board finds after public hearing (a) that the modification or elimination, in the opinion of the Community Zoning Appeals Board, would not generate excessive noise or traffic, tend to create a fire or other equally or greater dangerous hazard, or provoke excessive overcrowding of people, or would not tend to provoke a nuisance, or would not be incompatible with the area concerned, when considering the necessity and reasonableness of the modification or elimination in relation to the present and future development of the area concerned, or (b) (i) that the resolution that contains the condition approved a school use that was permitted only as a special exception, (ii) that subsequent law permits that use as of right without the requirement of approval after public hearing, and (iii) that the requested modification or elimination would not result in development exceeding the standards provided for schools authorized as a matter of right without the requirement of approval after public hearing.</i></p>

The subject application has been reviewed by the Department of Regulatory and Economic Resources – Division of Environmental Resources Management (DERM) for compliance with the requirements of Chapter 24 of the Miami-Dade County Code (the Code) and meets the minimum requirements of the Code. Accordingly, the application may be scheduled for public hearing.

DERM has no pertinent comments regarding this application since the request does not entail any environmental concern.

## Concurrency Review Summary

A concurrency review has been conducted for this application and has determined that the same meets all applicable LOS standards for an initial development order, as specified in the adopted CDMP for potable water supply, wastewater disposal, and flood protection. Therefore, the application has been approved for concurrency subject to the comments and conditions contained herein.

This concurrency approval does not constitute a final concurrency statement and is valid only for this initial development order, as provided for in the adopted methodology for concurrency review. Additionally, this approval does not constitute any assurance that the LOS standards would be met by any subsequent development order applications concerning the subject property.

This memorandum shall constitute written approval as required by Chapter 24 of the Code.

If you have any questions concerning the comments or wish to discuss this matter further, please contact Christine Velazquez at (305) 372-6764.

The Department of Regulatory and Economic Resources Platting and Traffic Review Section has reviewed the subject application objects for the following reasons:

This land complies with Chapter 28 of the Miami-Dade County Code. The property is platted as Tract A of Plat Book 168, Page 21.

This application does not generate any new additional daily peak hour trips, therefore no vehicle trips have been assigned. This application meets the traffic concurrency criteria set for an Initial Development Order.

The Department's review of the above-referenced item is provided below. Additional comments will be provided as needed. If you should have any questions, please do not hesitate to contact Stacey McDuffie, Manager, Fiscal Management and Planning Division, at 305-514-6661. The PWWM has no objections to the proposed application.

**Application:** *The Miami-Dade County Department of Regulatory and Economic Resources (RER)* is requesting to delete Declaration of Restrictions recorded in the Public Records of Miami-Dade County, at Plat Book 24650 Pages 1768-1774. The deletion will allow for development of the site in accordance to the Ojus Urban Area District (OUAD), which allows for multi-family residential with options for mixed uses of retail, business and office.

**Size:** The subject property is approximately 0.67 acres.

**Location:** The subject property is approximately located at 20000 West Dixie Highway, in Miami-Dade County, Florida.

## **Analysis:**

### 1. Solid Waste Disposal

The Miami-Dade County Solid Waste Management System consists of both County facilities and private facilities under contract as follows: three Class I landfills (two owned by Waste Management Inc., of Florida) a Class III landfill, a Resources Recovery Facility waste to energy plant and associated ash monofill, and three regional transfer facilities. The Public Works and Waste Management Department (PWWM) does not assess or adjust estimated capacity requirements based on the impacts of individual developments. Instead, the Department maintains sufficient disposal capacity to accommodate five years of waste flows committed to the system through long-term interlocal agreements or contracts with municipalities and private waste haulers and anticipated non-committed waste flows. The latest Concurrency Status Determination issued on September 25, 2013, which is valid for one year, shows sufficient disposal system capacity to exceed the County's adopted level of service (five years of capacity). This determination, which is on file with the Regulatory and Economic Resources Department (formerly the Department of Planning and Zoning) is contingent upon the continued ability of the County to obtain and renew disposal facility operating permits from the Florida Department of Environmental Protection, as needed.

## 2. Garbage and Trash Collection Services

Pursuant to Chapter 15 of the Miami-Dade County Code (Code), entitled Solid Waste Management, the proposed development of multi-family units will meet the definition of multi-family residential establishments, while options for the development retail, business and office uses will meet the County Code definition of commercial establishments.

Per the Code, the following is required of multi-family residential and commercial establishments located in unincorporated Miami-Dade County:

"Every commercial and multi-family residential establishment shall utilize the solid waste collection services of either the proper governmental agency able to provide such services, or that of a licensed solid waste hauler authorized to perform such services by the Director of the Department." Therefore, the landlord or property owner is required to contact a private hauler to provide waste and recycling collection service.

## 3. Recycling: Multi-family Residential Establishments

Regarding multi-family units, **Section 15-2.2a** of the Code requires "every multi-family residential establishment shall provide for a recycling program which shall be serviced by a permitted hauler or the appropriate governmental agency and shall include, at a minimum, the five (5) materials listed in Section 15-2.2 below."

- 1) Newspaper
- 2) Glass (flint, emerald, amber)
- 3) Aluminum cans
- 4) Steel cans
- 5) Plastics (PETE, HDPE-natural, HDPE-colored)

**Section 15-2.2b** of the Code states the failure of a multi-family residential establishment to provide a recycling program or a modified recycling program pursuant to Section 15-2.4 hereof shall constitute a violation of this section for which the property owner(s) shall be liable, provided, however, that in the case of a condominium or cooperative apartment having a condominium association or cooperative apartment association, said association, rather than individual unit owners, shall be liable for any such violation.

Applicants are **strongly** advised to incorporate adequate space and facilities in their building plans to accommodate the required recycling program. Requests for approval of modified recycling programs must be made directly to the Department at 305 514-6666.

## 4. Recycling: Commercial Establishments

The following language from **Section 15-2.3a** of the Code requires commercial establishments "to provide for a recycling program, which shall be serviced by a permitted hauler or the appropriate governmental agency. The recycling program for commercial establishments must include a minimum of three (3) materials chosen from the following:

- |                                  |  |
|----------------------------------|--|
| 1) High grade office paper       | 6) Steel (cans, scrap)                         |
| 2) Mixed paper                   | 7) other metals/scrap production materials     |
| 3) Corrugated cardboard          | 8) Plastics (PETE, HDPE-natural, HDPE-colored) |
| 4) Glass (flint, emerald, amber) | 9) Textiles                                    |
| 5) Aluminum (cans, scrap)        | 10) Wood                                       |

**Section 15-2.3** of the Code states the failure of a commercial establishment to provide a recycling program or a modified recycling program pursuant to Section 15-2.4 hereof shall constitute a violation of this section for which the property owner and the owner(s) and operator(s) of the commercial establishment shall be jointly and severally liable.

**5. Waste Storage/Setout Considerations**

**Section 15-4** of the Code requires that plans for storage and collection of solid waste be adequate before a building permit may be issued. Site plans must address location, accessibility, number and adequacy of solid waste collection and storage facilities. The site plan legend must contain the following statement: "Facilities for the collection and storage of solid waste are shown in accordance with Section 15-4 of the Miami-Dade County Code."

**6. Site Circulation Considerations**

It is required that development plans associated with this project incorporate at least one of the following traffic circulation criteria to minimize the reversing of waste vehicles and hence, provide for the safe circulation of service vehicles:

- a. Cul-de-sac with a minimum 49 foot turning radius (no "dead-ends")
- b. "T" shaped turnaround 60 feet long by 10 feet wide
- c. Paved throughway of adequate width (minimum 15 feet)

In addition, any and all alleyways designed with utilities, including waste collection, provided at the rear of the property should be planned in accordance with standard street specifications with sufficient width and turning radii to permit large vehicle access. Additionally, there should be no "dead-end" alleyways developed. Also, a sufficient waste set-out zone should be preserved (between the edge of the pavement and any possible obstructions such as parked cars, fencing, etc.,) that would interrupt or preclude waste collection.
